VS Statement of Product Lines And/Or Products Including Recycled Content

VS America in its continual effort to address environmental concerns, offers many products which include recycled and/or post consumer recycled materials.

The products and/or product lines are the following but not limited to:

- **PantoMove series (with plastic seat shells)**
- **PantoSwing series (with plastic seat shells)**
- **Compass Chair series (with plastic seat shells)**

Plastic seat shells contain some content of scrap from polypropylene parts that have been recycled into the manufacturing process

- **Uno-M Desk series, Step-By-Step and the Classic skid table (with LIGNOdur tops)**

LIGNOdur table tops are made using surplus beech wood sawdust and wood shavings from sustained reforested woodlands that are recycled back into the production process. This patented process compresses wood scrap at high temperatures. The surface is noted for its durability and resistance to breaking, cracking, deforming, and delaminating.

- **All products with steel parts.**

Tubular steel parts are extensively recycled back into production for new steel parts when old furniture is shipped back into the factory and re-used for the manufacturing process. Depending on the specific melting process, at least 30% of steel parts is recycled and it is even possible to use up to 100% scrap as the basis for the raw steel materials.

Best Regards,

VS America, Inc.
